
Latex Basics

Submission Guidelines for assignment

1. In the file readme.txt in team-name directory, which contains contribution of each team member, roll number and references (cite where you get code/code snippets from).
2. Rename the directory team-name to actual team name instead of
E.g. Coders
3. Compress the directory to <team_name>.tar.gz
e.g. coders.tar.gz
4. Submit one assignment per team. Please.

Problem 1

You are given a pdf file which was created using Latex. You need to replicate the same document in pdf format using Latex and make sure you try to replicate all the styles, sizes, fonts, etc. used in the document provided.

You can change the text, for example, The name in the title of the document, the names present anywhere else in the document, and/or anything which you would like to replace. But the format of the document, including the Table of Contents, sections, subsections, bold/italic/emphasised fonts, and so on should be replicated as it is.

You must upload all the files (TeX files along with the compiled PDF) on the Team gitlab repository(just for backup of files) on <http://git.cse.iitb.ac.in> along with Moodle. No branching / merging required for this InLab.

Make sure that when the tex files are compiled you get the submitted pdf, defaulters will be heavily penalised.

Submission Format-

<team-name>.tar.gz

-team-name/

- tex files
- compiled pdf
- readme.txt
